DATA PROCESSING AGREEMENT

This Data Processing Agreement ("DPA") forms part of the Company's general terms and conditions of purchase accepted by Supplier (the "T&C"), and shall apply to all services carried out by Supplier on behalf of the Company under the Contract between the Parties (the "Services").

This DPA details the Parties' respective obligations regarding the protection of Personal Data that is directly or indirectly supplied by Company to Supplier under the applicable Contract or which the Supplier is required to Process pursuant to the Contract on behalf of the Company. The measures provided for in this DPA shall apply to any and all activities associated with the Services. The provisions set forth below apply where Supplier processes Personal Data for the purposes of performing the Services.

Where the Services provided under the Contract benefit Affiliates of Company either directly or through the signature of any relevant documentation (e.g. implementation agreement, statement of work, service order, etc.), the Parties expressly agree that each such Affiliate of the Company shall be regarded as a Controller independently in its own right.

1. ARTICLE 1 – DEFINITIONS

The Parties agree that terms used but not defined in this DPA, such as "Personal Data Breach", "Data Subject", "Personal Data", "Controller", "Processor", "Processing", "Supervisory Authority(ies)" shall have the meaning assigned to them under the Applicable Personal Data Protection Law, whether defined under the same term or as a substantially equivalent term. Capitalized terms not defined in this DPA or in the Applicable Personal Data Protection Law, shall have the meaning assigned to them in the T&C.

The following terms shall have the meaning set out below:

- "Applicable Personal Data Protection Law" shall mean any data protection and/or privacy laws or regulation, directive, guidelines, policy, code, rule or order of any country or jurisdiction that is applicable to the Processing of the Personal Data contemplated under the Contract and/or to which a Party is subject to, including but not limited to, the Malaysian Personal Data Protection Act 2010 ("PDPA") and related subsidiary legislations, as amended from time to time.
- "Subprocessor" shall mean any natural or legal person engaged by the Supplier only for the performance of the Processing under the Contract and as authorised in advance, either generally or specifically, as agreed between the Parties, in writing by the Controller.
- "Third Party" shall mean any person or entity other than the Controller and Processor.

2. ARTICLE 2 – PARTIES RESPECTIVE ROLES AND RESPONSIBILITIES

The Parties agree that, for the purposes of the Contract, Company is the Controller and Supplier processes Personal Data as a Processor.

2.1. The Company's roles, responsibilities and obligations as a Controller

Company as Controller shall comply with its own obligations under Applicable Personal Data Protection Law regarding the Processing conducted by Supplier, as Processor, to provide the Services under the Contract.

2.2. Supplier's roles, responsibilities and obligations as Processor

Supplier, as Processor, processes the Personal Data on behalf of and in accordance with the documented instructions it receives from Controller. Accordingly, Supplier, as Processor, shall only process the Personal Data exclusively for the purpose of fulfilling its obligations and providing the Services under the Contract, with Controller's prior written consent; or when required by law or an order of court, but shall notify Controller as soon as practicable before complying with such law or order of court at its own costs.

Processor's obligation to comply with the terms of this DPA is qualified as an obligation to achieve a defined result. As a consequence, Supplier shall only be able to avoid liability for any breach to the provisions of this DPA by demonstrating that it is not responsible for such breach.

Processor accepts and warrants that it will comply with the following:

2.2.1. Compliance with Applicable Personal Data Protection Law

Processor shall comply with Applicable Personal Data Protection Law when performing its obligations under this DPA, in such a way as to not expose Controller to any violation of Applicable Personal Data Protection Law. Processor shall ensure its Processing of the Personal Data shall be in accordance with the standards and requirements set out from time to time by the Supervising Authority, including without limitation, the Malaysian Personal Data Protection Standards 2015 and Personal Data Protection Regulation 2013 (as may be amended, extended, re-enacted, or interpreted from time-to-time).

2.2.2. Compliance with Controller's instructions

Processor shall process Personal Data on behalf of Controller exclusively in order to provide the Services for the purposes defined by Controller as well as in accordance with the documented instructions received from Controller (as set out in the Contract), unless Processor is required to do so by Applicable Personal Data Protection Law to which Processor is subject. In such case, Processor shall inform Controller of that legal requirement before the start of the Processing, unless that law prohibits such information on important grounds of public interest.

If Processor becomes aware of the fact that all or part of the instructions it receives from Controller may constitute an infringement of Applicable Personal Data Protection Law or any relevant applicable law, it shall, without delay, inform Controller of such potential infringement to request revised instructions, unless Applicable Personal Data Protection Law or other relevant applicable law prohibits the provision of such information. To the extent strictly necessary, Controller shall adapt its instructions, and Processor shall assist Controller in doing so, in order to ensure that the Processing complies with Applicable Personal Data Protection Law and any relevant applicable law. Once the new instructions are defined, Processor shall implement them without delay.

Controller shall be entitled to supplement its instructions in writing to Processor from time to time during the course of the performance of the Contract.

2.2.3. Processor non-compliance

If Processor cannot comply, for whatever reason, with any of the provisions set out in this Article 2.2, Processor must inform Controller promptly of its inability to comply, in which case Controller reserves the right to immediately and automatically suspend any Processing and/or terminate the Contract without incurring any penalties or charges for such termination.

Processor shall not modify, amend or alter the contents of the Personal Data unless expressly instructed to do so in writing by Controller.

2.2.4. Compliance in case of subcontracting/subprocessing

Processor shall not disclose or permit the disclosure of Personal Data to any Third Party, and/or shall not subcontract all or part of the Processing to any Subprocessor, unless Processor has obtained the prior specific written approval of Controller.

Where Processor is authorized to subcontract all or part of the Processing, it shall enter into a contract with the Subprocessor whereby the latter will be required to comply with obligations no less onerous than Processor's obligations under this DPA.

Processor shall, at the time of selection of a Third Party to become a Subprocessor and during the entire term of the Contract ensure that Subprocessor provides sufficient guarantees to implement appropriate technical and organisational measures to meet the requirements of Applicable Personal Data Protection Law and the Contract (including this DPA). Such subcontracting shall not release Processor from its responsibility for its obligations under the Contract (including this DPA). Processor remains solely responsible for the work and activities of such Subprocessors, and Processor shall be held liable for the acts and omissions of any Subprocessor(s) to the same extent as if the acts or omissions were performed by Processor.

2.2.5. Obligation to assist Controller

The Parties agree that, Processor, as a professional is required to assist Controller in the implementation of the Processing and of all operations to ensure compliance of the Processing with Applicable Personal Data Protection Law. In this respect, and in accordance with Applicable Personal Data Protection Law, Processor shall, upon request from Controller, provide:

2.2.5.1. Assistance in the management of Data Subject requests

Processor shall, in accordance with Applicable Personal Data Protection Law assist Controller by implementing appropriate technical and organizational measures designed to allow Controller to comply with its obligations to respond to requests from Data Subjects for exercising their rights.

Processor shall immediately notify Controller after receipt of any request from a Data Subject regarding that Data Subject's Personal Data. Where the Data Subject's request is addressed directly to Processor, Processor shall not directly answer to Data Subject requests but shall forward such request upon receipt to Controller, unless it has been duly and expressly agreed in advance between the Parties, in which case the response shall be provided in accordance with the terms agreed between the Parties. Processor shall answer to this request in compliance with the written answer provided by Controller. Such answer shall be provided to Processor in a reasonable timeframe after notification of the request by Processor. Processor shall also maintain a register of such requests and provide it upon request to Controller.

2.2.5.2. Assistance in the management of relationships with Supervisory Authorities

Upon request from Controller, Processor shall assist Controller to allow it to comply with its obligations towards competent Supervisory Authorities. For this purpose, Processor shall provide all relevant information requested either by Controller or directly by any competent Supervisory Authority in the context, notably, of the fulfilment of notification or prior consultation obligations, of addressing requests, controls and investigations or of the management of Personal Data Breaches.

Processor shall immediately notify Controller after receipt of any request for disclosure of the Personal Data by a law enforcement authority, a judicial, government or a regulatory authority (having requested such authority to direct the request to Controller directly), unless otherwise legally prohibited (such as a prohibition under criminal law to preserve the confidentiality of a law enforcement investigation). Processor shall provide Controller in a best timely manner with any information on the aforementioned requests Controller may ask.

2.2.5.3. Assistance in the completion of Data Protection Impact Assessments (DPIA)

Upon Controller's request, Processor shall provide reasonable assistance, notably by providing clear, complete and accurate information about the Processing, to Controller where the Processing requires, for example, a Data Protection Impact Assessment, or a prior consultation with the competent Supervisory Authority.

2.2.6. Management of persons granted access to Personal Data – confidentiality and training

Processor shall ensure that the authorised persons who are granted access to the Personal Data under the Contract are properly trained on the Processing of Personal Data and are only granted access to such Personal Data on a need-to-know basis subject to obligation of confidentiality. Processor shall also take steps to ensure that the authorised persons only process Personal Data in accordance with the terms of this DPA, unless required to do otherwise under Applicable Personal Data Protection Law, in which case, Processor shall immediately inform Controller, unless prohibited by applicable law.

Processor guarantees that any authorised persons entrusted with Processing Personal Data hereunder are legally or contractually bound to an obligation of confidentiality or secrecy, and have been duly instructed about the Applicable Personal Data Protection Law. As the case may be, Controller may require the signature of additional confidentiality agreements by such persons and Processor shall be responsible for ensuring that such confidentiality agreements are duly signed.

During the term of the Contract (including this DPA), Processor shall implement and maintain up to date trainings and awareness programs for its employees, subcontractors and Subprocessors processing Personal Data on Controller's behalf regarding compliance with Applicable Personal Data Protection Law, including, notably, principles and rules regarding the implementation of adequate technical and organizational measures for the security of Personal Data.

2.2.7. Liability

Processor shall be fully accountable and liable in the event of any breach of its obligations under this DPA and/or non-compliance with the Applicable Personal Data Protection Law. Processor shall indemnify, defend and hold harmless the Controller and its employees, officers, directors, subcontractors, representatives and/or agents, from and against all actions, claims, liabilities, judgments, demands, losses, damages, statutory penalties, expenses and cost (including legal costs on an indemnity basis), that may result from or be caused by Processor's or its Subprocessor's, subcontractor's or agent's: (a) breach of its obligations under this DPA; and/or (b) act, omission or negligence that causes or results in the Controller being in breach of the PDPA and/or Applicable Personal Data Protection Law, without being subject to the limitation of liability, if any, set forth in the Contract.

2.2.8. Records of processing activities

Processor shall maintain a record of all categories of Processing activities carried out on behalf of Controller, in the performance of the Contract. Such records of Processing activities shall contain, at least, the name and contact details of the Processor and its representatives (including, for instance, Processor's data protection officer, if any), the categories of processing activities carried out, the transfers of Personal Data to a Third Party outside Malaysia or any jurisdiction of the Applicable Personal Data Law in which the Processing falls under (including to a Subprocessor) and the technical and organizational security measures implemented by Processor.

Processor shall make such records of Processing activities available upon request to any competent Supervisory Authority and to Controller.

2.2.9. Access to Personal Data

Upon Controller's written request, Processor shall promptly provide Controller with access to the Personal Data that the Processor has in its possession or control and co-operate with Controller to enable it to satisfy any request (i) from a Data Subject to access to or obtain the correction of Personal Data and/or enforce their rights under Applicable Personal Data Protection Law; and/or (ii) from a regulator regarding the Processing, including in the event of an investigation. Notwithstanding anything herein to the contrary, if instructed in writing by Controller or where prohibited under applicable laws and regulations, Processor shall ensure that it does not disclose or allow access to Controller, personally identifiable data which allows the identification of any individual, except where necessary or permitted for Controller to discharge its obligation under applicable laws and regulations.

Processor shall ensure all Personal Data transferred to or stored on any mobile or transportable device, including but not limited to laptop computers, tablets, smartphones, CD/ DVD, USB sticks, or backup tapes, shall be in an encrypted form.

2.2.10 Accuracy and Correction of Personal Data

Where the Controller provides Personal Data to the Processor, the Controller shall make reasonable effort to ensure that the Personal Data is accurate and complete before providing the same to the Processor. The Processor shall put in place adequate measures to ensure that the Personal Data in its possession or control remain or is otherwise accurate, complete, not misleading and kept updated by having regard to the purpose, including any directly related purpose, for which the Personal Data was collected and processed. In any case, the Processor shall take steps to correct any errors in the Personal Data, as soon as practicable upon the Controller's written request.

ARTICLE 3 – SECURITY AND CONFIDENTIALITY MEASURES

Processor guarantees that it will take, implement and maintain during the entire term of the Services, all reasonable technical and organizational security measures (including, where appropriate, physical, administrative, procedural and information and communications technology measures) which shall (i) ensure the confidentiality, integrity, availability and resilience of the processing systems and services, and regularly update them, to ensure a level of security appropriate (a) to the risk related to the Processing of the Personal Data (taking into consideration, notably, the relevance of pseudonymisation, or encryption of the Personal Data, the nature of the Personal Data and the harm that would result from such loss, misuse, modification, unauthorized or accidental access or disclosure, alteration or destruction; (b) to the place or location where the Personal Data is stored; (c) to any security measures incorporated into any equipment in which the Personal Data is stored; (d) to the measures taken for ensuring the reliability, integrity and competence of its personnel having access to the Personal Data; and (e) to the measures taken for ensuring the secure transfer of the Personal Data, and (ii) protect Personal Data particularly against any unauthorized, unlawful or accidental access, collection, use, disclosure, copying, modification, disposal, loss or destruction of Personal Data, or other similar risks, and the loss of any storage medium or device on which personal data is stored (whether such Personal Data is on Processor's systems or facilities, in transit or being disposed of).

In any case, Processor shall implement technical and organizational measures, including continuity and disaster recovery measures, to ensure that it has, at all times, the ability to restore the availability and access to Personal Data in a timely manner in the event of a physical or technical incident; and at least implement the information security and quality measures provisions currently set out in <https://suppliers.sanofi.com/en/standards-and-procedures> (as amended by Controller from time to time). The implementation of such minimum standards is subject to Processor's review of its appropriateness in consideration of the Processing and its associated risks. Should Processor implement different security measures, it shall inform and obtain Controller's prior written approval. In any event, any such modifications shall only aim at increasing the level of security afforded to the Personal Data. Processor shall also log all activities relating to the access to the Personal Data.

Processor guarantees that it will regularly test and monitor the effectiveness of the technical and organizational security measures implemented by means of an audit. Processor shall periodically identify reasonably foreseeable internal and external risks to the security, confidentiality, and integrity of the Personal Data, and ensure that there are safeguards in place to control those risks. Processor shall monitor all its staff for compliance with its security and privacy program and policy requirements. Processor shall communicate to Controller on a regular basis and at least once a year a summary report of the effectiveness of these measures. The provision of such reports shall not preclude Controller from its right to conduct audits as provided for in section 7 below.

Processor shall implement and maintain robust privacy and data protection policies and procedures to ensure Personal Data in its care is properly safeguarded at all times. As may be requested by Controller, Processor shall provide a copy of its written privacy and data protection policies and procedures to Controller.

ARTICLE 4 – TRANSFERS OF PERSONAL DATA

Processor shall not Process and/or implement any transfer of Personal Data outside Malaysia or any jurisdiction of the Applicable Personal Data Law in which the Processing falls under (including to a Subprocessor) except with Controller's prior written approval, and only if allowed to and in accordance with the requirements under Applicable Personal Data Protection Law. If Controller provides consent, Processor shall provide a written undertaking to Controller that the Personal Data

- cooperate with Controller and take all measures as necessary to prevent future Personal Data Breach from occurring again; and
- where Controller determines that a Personal Data Breach notification is required under Applicable Personal Data Protection Law, Processor shall reimburse Controller for all reasonable costs associated with providing notification to Data Subjects and Supervisory Authorities, unless Processor demonstrates that the Personal Data Breach was caused by Controller's negligence or wilful misconduct.

Processor shall promptly notify Controller and shall answer appropriately and without delay to all inquiries from Controller regarding:

- Processor's Processing of Personal Data;

ARTICLE 7 – AUDIT

Controller shall be entitled to carry out any controls or audits it deems relevant regarding Processor's compliance with its obligations under this DPA. Such audits and controls may be carried out also at the premises and/or on the systems of Subprocessors to which Processor has subcontracted all or part of the Processing according to the provisions of Article 2.2.4 above and shall take place in accordance with the audit provisions set out in the T&C.

In addition to the audits provided for in the Contract, Controller shall, in the event of a Personal Data Breach, be entitled to trigger at any time any controls or audits it deems necessary regarding Processor's compliance with its obligations under this DPA and with regards to the causes, consequences and remediation actions related to said Personal Data Breach.

The audit provisions of this section also include the right to audit Subprocessors and their systems. The audit provisions of this section does not release Processor from taking all reasonable steps to verify that its Subprocessors comply with the provisions of this DPA.

ARTICLE 8 – RETENTION OF PERSONAL DATA

The Processor shall not retain Personal Data (or any documents or records containing Personal Data, electronic or otherwise) for any period of time longer than is necessary to serve the purposes of the Contract. The Processor shall, upon the request of the Controller or upon expiry or termination of the Contract: (a) return to the Controller, all Personal Data; or (b) permanently delete or destroy all Personal Data in its possession within 15 calendar days of being requested to do so by Controller (or such other timeframe as may be requested by Controller or prescribed under applicable laws), and, after returning or permanently deleting or destroying all Personal Data, provide the Controller with evidence and written confirmation of such destruction and deletion from all its records and that it no longer possesses any Personal Data.
